

CENTER FOR DAIRY RESEARCH

"Solution Based Research Backed by Experience, Passion and Tradition"

Dairy Safety & Quality Program

Although many dairy manufacturing plants have developed more sophisticated and automated equipment, safety is still a concern. The Wisconsin Center for Dairy Research (CDR) Dairy Safety/Quality Applications Program is a committed partner in your efforts to produce safe, high-quality and wholesome dairy products.

Practices:

Good manufacturing practices (GMPs) are industry guidelines that can ensure the manufacture of a safe dairy product during the day-to-day operation of a dairy plant. CDR is available to assist dairy plants as they follow GMP's and, perhaps, go one step further to implement a HACCP program. Consultations and on-site visits are available for plant audits and review of sanitation programs. Support and help is available for both quality and regulatory issues.

Short Courses:

- ⦿ Cleaning and Sanitation
- ⦿ HACCP

Outreach:

- ⦿ Perform third party audits
- ⦿ Review your GMP program
- ⦿ Review a dairy facility's quality assurance/quality control program and recommend changes
- ⦿ Regulatory liaison for plants
- ⦿ Analyze defects in butter and cheese
- ⦿ Troubleshooting issues in plants
- ⦿ Butter manufacturing
- ⦿ Grading contests
